## PROJECTS

---

- **Portfolio Project:**

- A fully responsive webpage showcasing my experience and project work during my academic period.
- Use of tailwind CSS and transition animation over the hover to make the User Experience better.
- A fully functioning Contact form incorporated with the help of getForm API.
- Smooth Scroll is implemented in the Navbar with the help react scroll module.

- **Hunt-Yo-Recipe App:**

- Developed a React-based application designed to streamline recipe discovery by integrating YouTube videos. Users can search for recipes based on their favorite ingredients, enhancing the culinary experience with instructional videos for each dish.
- Implemented the MealDB API to facilitate a sophisticated recipe search functionality within the application, ensuring users can seamlessly explore and discover diverse culinary options based on their preferred ingredients.
- Successfully integrated a chatbot functionality into the application, providing users with real-time support. This feature leverages the ChatGPT API to deliver dynamic and responsive assistance, enhancing the overall user experience with timely and effective support services.

- **Dictionary App:**

- Designed and implemented a dictionary application using HTML, Bootstrap, and JavaScript.
- This user-friendly app enables seamless word lookup, providing users with accurate and comprehensive definitions for the words they search.
- Utilized a free dictionary API sourced from the reputable RAPIDAPI platform to enhance the functionality of the application.
